

Snow Hook Installation instructions for Quadro Panel roofing System

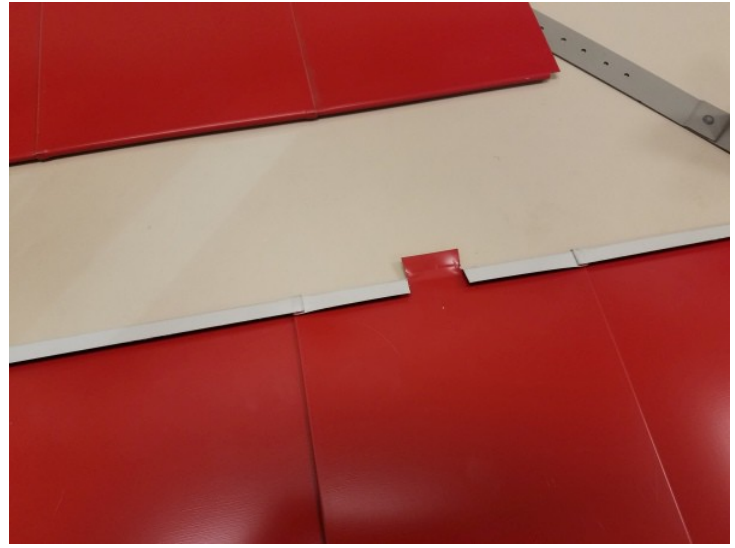

Determine the snow hook placement per row and per column

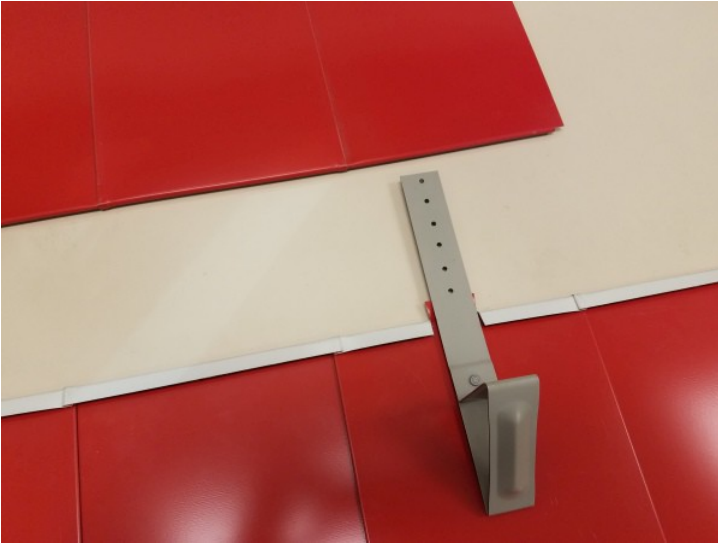

Mark the upper seam where the snow hook needs to be installed

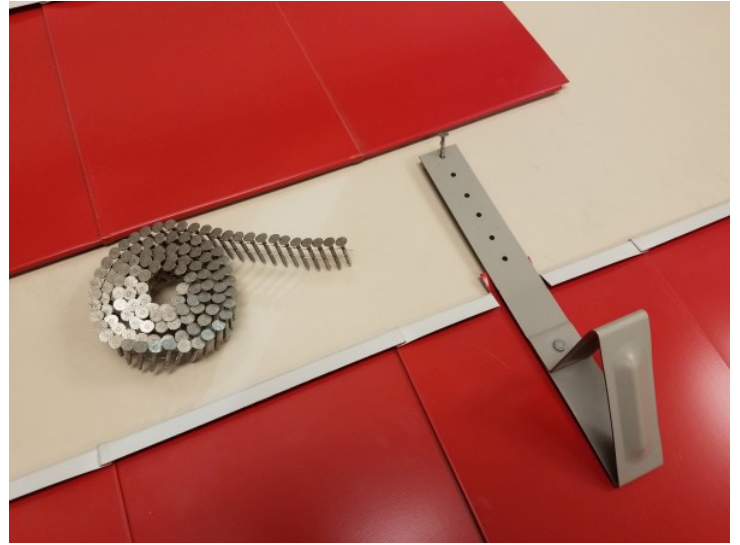

Use sheet metal snips to cut the seam at the marks to create a channel as wide as the snow hook
5066 West Amelia Earhart Drive - Salt Lake City, UT 84116

Bend the seam open and flatten it to the roof

Use your measurement to align the snow hooks with the other snow hooks in the same row - ***

Use ring shank nails or screws to fasten the snow hook with at least 4 fasteners

Interlock the next panel over the snow hook

Snow hook can be placed under the vertical seam if needed

*** To prevent the snow hook from lifting off the surface, pre-bend it slightly downward before fastening
